

Angelina Rahimi, MCP

Founder of Aura Planning

Angelina Rahimi, Founder of Aura Planning, has practiced urban planning and design, project management, and community engagement for over 20 years. She has initiated several projects for utility agencies, city agencies, and community-based organizations in Canada and the United States.

Her work efficiently merges economic development, energy conservation, and community empowerment to promote constructive change. She has developed innovative and replicable programs by leveraging policies, community partnerships, and neighborhood support. Projects she has led include Sacramento's first eMobility Hub, a Franklin Boulevard Transformative Climate Communities (TCC) planning project, and two Clean Mobility Options (CMO) Community Transportation Needs Assessments in South Sacramento.

She has received funding or partnered with government, non-government, and community-based organizations such as California Energy Commission, California Air Resources Board, City of Sacramento, California Mobility Center, Sacramento Public Library, Sacramento Municipal Utility District, Green Technical Education and Employment, Community Resource Project, and Fulton-El Camino Recreation and Parks District. In 2022, Angelina was nominated for a California Energy Commission Hall of Fame Award.

Her areas of expertise are High Tech, High Touch Community Engagement, Community Planning & Urban Design, Planning & Implementation of eMobility Hubs, Land-Use Policy Analysis, and Project Initiation, Management & Implementation.

Angelina's has formed a dynamic network of architects, engineers, researchers, and community members to join in her mission. Her innovative, community-based approach enables her to meet the needs of underserved neighborhoods.
